

FOR IMMEDIATE RELEASE

Biofuels Technical Solutions Provider FEC Solutions Adds Key Resources

Des Moines, IA, March 9, 2011 – FEC Solutions, a biofuels technical solutions provider and marketer of ethanol production co-products, announced today that it has hired Nicholas Sikes as Operations Manager and Todd Nicklaus as Account Manager.

Sikes has a long history in the biofuels industry and most recently worked with Renewable Fuel Products in Ames, Iowa to commercialize an innovative renewable diesel system. His focus has been on process improvement and bringing technologies together in unique ways to improve process efficiencies.

"Nicholas brings a wealth of renewable fuels and technical process experience to FEC Solutions to add value for our corn oil extraction partners," said Joseph Riley, General Manager of FEC Solutions. "We will now be able to provide the technical expertise required to improve efficiencies in the back end of the ethanol process."

In addition to Sikes, FEC Solutions announced the addition of Todd Nicklaus as an Account Manager. Nicklaus has more than two decades of agriculture experience ranging from selling feed ingredients and products to trading dried distiller grains for ethanol plants. Nicklaus most recently worked with Form-A-Feed.

"With the addition of Todd, FEC Solutions is poised to build upon our existing relationships and create new opportunities which bring synergy to our feed and fuel partners," Riley stated. "Todd has long been active in the American Feed Industry Association and has many connections in both the feed and fuel industries."
